

January 28, 2003

Dear Parents of the western Museum of Flight,

Thank you for teaching us stuff about the airplanes. I really appreciated that you for the bus for us so we could come to the museum.

It was really Fun when we got in the airplane that had the 76 sign on it. Also what was fun playing on the computers, getting in the airplane model and using the control and pedals.

The last things that were fun were that they told us about the first radio controlled planes, showed us about the photos they took back in time, and going in the cockpit.

Sincerely,
Eduardo Perez
