

1/28/05

Dear Docents of the Western Museum of Flight,
Thank you for showing lots of new stuff and letting us go inside the Spirit of 76 plane and the Simulator. It was also fun when you asked us what the dumbest question in the world was and the answer is the question that isn't asked. My favorite part was when we went in the spirit of 76 airplane. My other favorite part was when I went in the simulator. I also liked the computer game except I crashed too much. I also liked it when we learned about the Wright Brothers, Orville and Wilbur. I liked the airplane that had wings shaped like a bat's wings.
